## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
2. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 3-10, 16, and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Regarding Claims 16 and 17, it is unclear what is meant by the phrase "wherein a surface layer of the electroconductive film is not peeled when a resin molded body is formed from a resin using said resin-forming mold and then released from the mold." It is unclear whether a specific resin forming process constitutes a test for whether this condition is satisfied. If so, it is unclear what the test is. If not, it is unclear how one of ordinary skill in the art can ascertain whether a particular mold satisfies this condition.

### ***Response to Amendment***

5. Applicant's Substitute Specification is acceptable and has been entered. The objection to the Specification of the Office Action mailed on 24 March 2006 is withdrawn.
6. In view of applicant's amendments and arguments, the section 112, second paragraph rejections of the Office Action mailed on 24 March 2006 are withdrawn.

***Allowable Subject Matter***

7. Claims 11-15 are allowed.
8. The reviewed prior art does not teach or suggest the claimed subject matter of Claims 11-15. Particularly, there is no teaching or suggestion of forming the resin forming mold by fitting aluminum, partially evaporating aluminum, fitting at least one electroconductive metal, and then vacuum depositing left aluminum and the at least one electroconductive metal in combination with the other claimed limitations.
